

INSTALLATION INSTRUCTIONS

Guardian 100

Heat Shield Kit

574797

View these instructions online at www.lbwhite.com

Kit Contents:

DESCRIPTION	QTY.
Heat Shield	1
Self-Tapping Screws	2

Tools required:

- 1/4" Socket
- Impact Tool

Qualifications for installation of the kit:

- You must be able to read and understand these instructions.
- You must be properly trained and have sufficient experience in servicing heaters and be capable of testing the heater for proper operation.

General information:

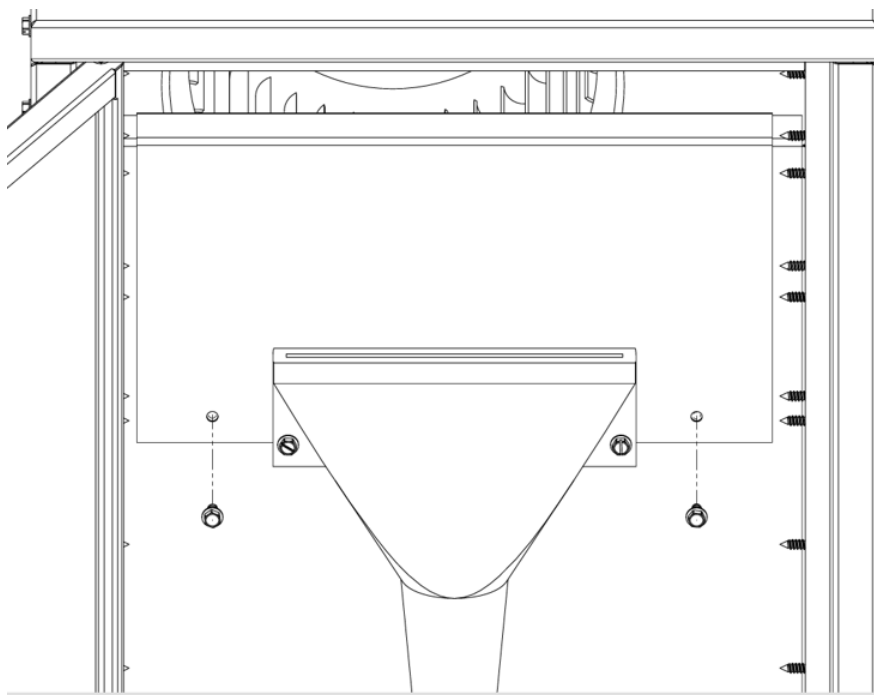

- The following instructions provide information for the installation of the heatshield for Guardian 100 heaters.
- Read all instructions carefully before beginning installation.
- Allow the heater to cool down or in cold condition before installing shield.
- Always wear protective safety glasses and gloves during assembly.
- Tighten all screws securely.

Preparation:

- Check all packing material carefully for possible damages during shipment.
- Safely lift and support the heater to gain access to the burner side of the heater.

Installation:

1. Remove the igniter. This is the only part that will need to be removed. The illustration below has a panel removed for ease of viewing only.
2. Clean any debris from the upper heat chamber where the shield will be secured.
3. Lift the shield over the burner and slide the shield behind the burner so the lip on the top of the shield rests on the burner chamber.
4. Install the 2 self-tapping screws as shown in the illustration below.
5. Reinstall the igniter.
