

# L.B.WHITE

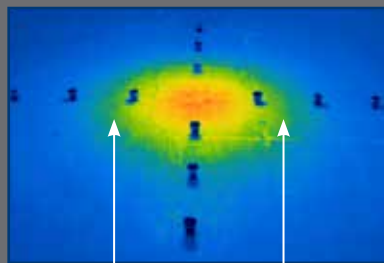

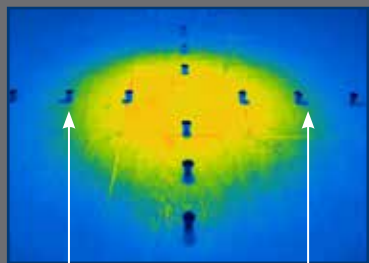

## L-40 & H-40 Radiant Heat Brooders

Light, yet robust low profile design  
delivers best-in-class heat pattern.

### FREIGHT SAVINGS

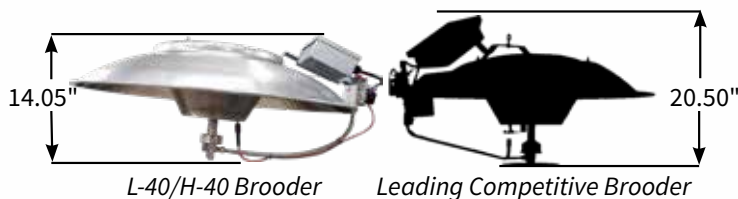

Ships in master packs of eight.

### WIDE, CONSISTENT HEATING AREA

The L-40/H-40 produces a wider, more temperature consistent heat zone than leading competitive low pressure brooders, giving birds more options to find their comfort zone.

Pictures shown at left are taken after 5 minutes in identical lab tests.  
Typical run time of a brooder after pre-heat is 3 to 5 minutes.

### LOW PROFILE

The L-40/H-40 are only 14 inches tall and has a low profile, taking up less room in a house and making it easier to handle and work around.

### EASY TO ASSEMBLE

The L-40/H-40 are only five parts, making assembly quick and straightforward.
