REEVES EVAPORATIVE COOLING SYSTEMS

- Multiple layouts to fit your specific needs
- Multiple sump and pump options
- Aluminum or Stainless Steel construction
- The best customer service in the business

Our evaporative cooling systems are built to fit any size. With our many pump and tank options, you can customize your system to cover any greenhouse cooling need you have.

Multiple tank and pump options give you greater flexibility to configure your cooling system to meet your needs. We also offer various pad and spray nozzle options.

We offer wet walls in a variety of custom sizes, and our pad media is available with or without a protective algae edge coat.

Evaporative Cooling System Options

Multiple tank and pump options give you greater flexibility to configure your cooling system

10", 12", and 15" sump tanks for specific water needs.

Roto Molded 31 gallon sump tank can be used in the center or either end of a system.

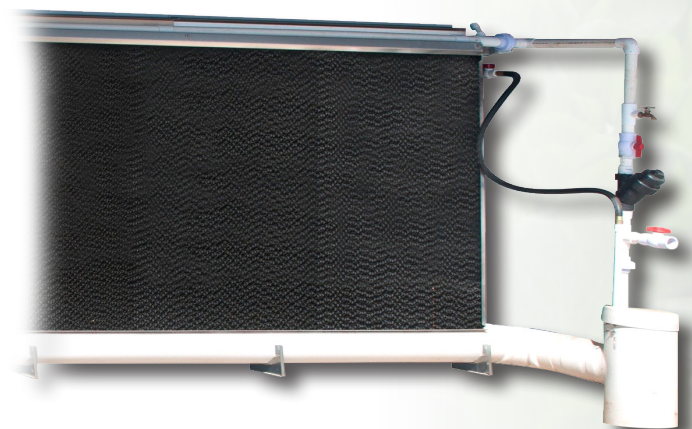

The built in drain in the bottom makes winterizing your system a snap!

Go tankless with an above ground centrifugal pump.

The high volume, self priming centrifugal pump eliminates the need for a sump tank and can be used for end fed or center fed systems.

Systems powered by Flint and Walling or Goulds pumps. Multiple sizes and models available to fit any specific cooling need.
