- Open Heater Sizing Guide.
- Tap More (“...”) icon
- Tap Pin to Start.

The screenshot shows the L.B. White Heater Estimator app interface. At the top is the L.B. White logo. Below it is the title "Heater Estimator" and the instruction "To determine Btuh heater requirements...". The "Room Measurements" section includes a dropdown for "Find Cubic Measurements of Area by Entering Room Measurements in" set to "Feet", and input fields for Height, Width, and Length, all in feet. Below these is a field for "Cubic Feet of the Tent/Marquee:". The "Room Temperature" section has a dropdown for "Select Desired Rise in Room Temperature(°F)" set to "60". A "Requirement for Room:" field is also present. A "May We Suggest:" section lists three heater models: Premier 80's, Premier 170's, and Premier 350's, each with a small image of the heater. The website address "www.lbwhite.com" is at the bottom.
